

# Phoenix Real Estate- The Buying Process

## Offer Accepted...what happens next??

Once the offer has been verbally accepted we will email you the purchase contract with associated documents, review it with you and point out everywhere that needs signing and initialling. When the offer is returned to us by you, we then forward it on to the seller's Realtor and wait for the final signing by the sellers. This will be called the Executory Contract once it is returned to us.

---

Once we have the final signing the **earnest money (the deposit) will be due**. I will get the wiring instructions from the applicable escrow company to pass along to you so that you can go to your bank to wire transfer the deposit directly in to their bank account for safe keeping. It is recommended that you **add \$25.00 to the deposit amount** that you are wiring as the bank that is wiring the money down will likely use a middle-man bank that will have a \$10-20 charge...you don't want the deposit to arrive being short as this could potentially jeopardize your sale!

---

**Also, our inspection period begins.** This is typically 10 days (or whatever is negotiated) and gives us the opportunity to have a home inspection, termite inspection, mould inspection or any other kind of inspection that you would like to have done. The charges for these inspections will be 'added to your tab' and will be accounted for later when the closing or settlement statement is prepared.

During this time you might also want to check through a variety of websites that are available to you by reading the Buyer Advisory that I will provide you with. These websites are useful in finding information about the area, crime statistics, demographics, etc.

During this time the escrow company is going to request an HOA Statement from the Home Owner's Association which details any outstanding fees to be paid by the seller as well as any transfer fees (could be from \$150-400) or capital improvement fees, etc that the escrow agent will determine which side of the closing or settlement statement it is to be placed on...in other words...who is to pay for what. Dependant on what is negotiated in the offer will determine who is to pay for what and we will guide you through this. The HOA has by law 10 days to comply with the request for the information so once that we have an executed contract and open up escrow you can count on it taking up to 10 days to get the HOA documents necessary for closing. This waiting period coincides with our 10 day inspection period.

---

When you are satisfied or not satisfied with how everything checks out we will have you sign a form called the **Buyer Inspection Notice and Seller Response (BINSR)** with your selection indicated for accepting the property, or requesting repairs or canceling and then return to us. If you choose not to complete the sale, the escrow company will refund your deposit and we will carry on to find another appropriate home.

If you are satisfied with the home then the escrow process continues and all of the paperwork really starts to flow!

---

**The escrow company is going to email you a number of documents for your perusal and signatures that include:**

1) **Covenants, Conditions and Restrictions** (or commonly called the CCRs) this is the bylaws, so to speak, for the subdivision that all residents agree to by virtue of their completed purchase. They spell out what you can and can't do in your area such as no visible RVs, no painting or major landscaping changes without prior HOA authorization. These bylaws are in place to protect the homeowners and to preserve the beauty of their area. The CCRs do not require a signature...they are for your information purposes only. The size of them will be anywhere from 40-125 pages...guaranteed to put you to sleep!!

2) **Approval to Close** just needs your signature in order to commence with escrow

3) **Title Commitment Report** for title insurance to be issued (they don't use surveys or Real Property Reports here to transfer title as they do in Canada...they utilize title insurance to guarantee the title).

4) **How you would like to take title?** Please see the Ways To Take Title In Arizona page in the section of our main website section that is entitled 'The Escrow Process' (<http://www.albertatophoenix.com/Phoenix-Escrow-process.html>) for details on the selection available to you. This form must be signed in the presence of a notary public which if signed down here will be your escrow officer. If you are closing from out of the country, a lawyer will need to witness your signature because the County Title Recorder will only recognize lawyers as a notary public in Canada. Then return the original signed document to the escrow company by overnight courier service to ensure the speedy arrival (because Canada Post expedited service can still take a week to get here).

5) **Identity statement** (given name, address for where you'd like the property tax statements delivered, etc)

6) **Affidavit of property value** (for filing with the county office for public record of the sale)  
Once the Settlement Statement is prepared, the escrow company will be seeking your approval on it first prior to sending it off to the seller for their approval. Once we have approval on both sides you can wire the balance owing in to the escrow company's bank account. When received, the escrow agent will prepare the county recording documents and submit for recording of the deed.

---

**When the deed is recorded the escrow agent will notify everyone involved and the keys are releasable!!**

That is it.....we will guide you through this process but we wanted you to be familiar with what happens so that you don't get overwhelmed by it as the process is considerably more involved than when acquiring a property in Canada.

---

## Utility Companies, Property Insurance and Service Providers

Prior to closing, you will need to make arrangements for water, sewer, trash, electricity and/or natural gas to be in your name (unless tenant occupied). You should also arrange for property insurance. We can certainly make recommendations. This can generally be done online or over the phone.

The providers for electricity, natural gas and water/sewer are generally indicated on the MLS printout that we have provided to you. We will put an X beside the applicable provider on the checklist below and email it to you prior to your possession so that you can make the arrangements in advance.

Deposits may be required by providers on an individual basis. These deposits are generally refunded to you upon 12 consecutive on-time monthly payments. Automatic or online monthly payments may be arranged by each one as well for your convenience.....

**T Mobile:** <https://www.t-mobile.com/>

**Pre-paid cell phones:** many options for these at a variety of retailers including Wal-Mart & Target.

## Other Service Providers that we partner with

We can make recommendations for property management, banking and maintenance that includes:

**-banking...** it would be a good idea for you to open a checking account at a local bank while you are here making your purchase. Local businesses, contractors, landscapers, pool maintenance people, etc will take checks for services performed and/or goods and it would be convenient and organized for you to make out post-dated checks in advance of returning back home. Debit cards here are backed by Visa/Mastercard so you can actually use your card as a credit card as long as the funds are in your account to cover it. Also, it would be wise to get the wiring instructions for your account so that you can wire money from home periodically to maintain your available funds

**-property insurance...** we have a good State Farm Insurance agent and a Farmer's Insurance agent anxious for your business

**-handyman and contractors...**for flooring, painting, plumbing, framing changes, cabinetry, etc

**-house checking service...**that will come once a week, twice a week or once a month to check on your home, take pictures, test fixtures, share observations & recommendations.

**-pest control...**to keep the creepy-crawlies away

**-pool maintenance...**for maintenance, service and repairs

**-yard maintenance...**to look after landscaping, irrigation, weed control

**-in house property management....**to rent out and maintain your property if desired

**-security systems and monitoring...**for peace of mind
